Critical Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon the accompanying unaudited condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP"). The preparation of financial statements in conformity with U.S. GAAP requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, expenses, and the related disclosures at the date of the financial statements and during the reporting period. Although these estimates are based on our knowledge of current events, our actual amounts and results could differ from those estimates. The estimates made are based on historical factors, current circumstances, and the experience and judgment of our management, who continually evaluate the judgments, estimates and assumptions and may employ outside experts to assist in the evaluations.

Certain of our accounting policies are deemed "critical", as they are both most important to the financial statement presentation and require management's most difficult, subjective or complex judgments as a result of the need to make estimates about the effect of matters that are inherently uncertain. For a discussion of our critical accounting policies, see "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K for the year ended September 30, 2013.

Liquidity and Capital Resources

Working capital was \$10,795,524 at June 30, 2014 compared to \$1,870,968 at September 30, 2013. This includes cash and cash equivalent of \$1,310,238 at June 30, 2014 and \$66,963 at September 30, 2013, respectively. The reason for the increase in working capital was due to the acquisition of Rob Cemtrex GmbH.

Trade receivables increased \$2,756,515 or 149% to \$4,604,151 at March 31, 2014 from \$1,847,636 at September 30, 2013. The increase in trade receivables is attributable to larger operation as a result of acquisition of Rob Cemtrex GmbH.

Financing activities provided \$16,014,329 for the nine month period ended June 30, 2014 as compared to providing \$622,630 in the nine month period ended June 30, 2014. The increase is primarily related to loans received by the Company for Rob Cemtrex GmbH acquisition and the mortgage on the building and land in Neulingen, Germany (see NOTE 6).

We believe that our cash on hand, cash generated by operations, is sufficient to meet the capital demands of our current operations during the 2014 fiscal year (ending September 30, 2014). Any major increases in sales, particularly in new products, may require substantial capital investment. Failure to obtain sufficient capital could materially adversely impact our growth potential.
