

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(D)
OF THE SECURITIES ACT OF 1934

For the fiscal year ended September 30, 2011

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(D)
OF THE SECURITIES ACT OF 1934

Commission File Number: 000-53238

CENTREX, INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
Incorporation or organization)

30-0399914

(IRS Employer Identification No.)

19 Engineers Lane,
Farmingdale, New York 11735

(Address, including zip code, of principal executive offices)

631-756-9116

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class

Name of Each Exchange on Which Registered

Common Stock, \$0.001 par value per share

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Non-accelerated filer

(Do not check if a smaller reporting company)

Accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of December 21, 2011, the aggregate market value of the registrant's common stock held by non-affiliates of the registrant was \$3,071,356.12 based on the average bid and asked price of \$0.28 on December 21, 2011.

As of December 26, 2011, the registrant had 40,599,129 shares of common stock outstanding.

Documents incorporated by reference: None.

FORWARD-LOOKING STATEMENTS

Statements in this report may be "forward-looking statements." Forward-looking statements include, but are not limited to, statements that express our intentions, beliefs, expectations, strategies, predictions or any other statements relating to our future activities or other future events or conditions. These statements are based on current expectations, estimates and projections about our business based, in part, on assumptions made by management. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Therefore, actual outcomes and results may, and are likely to, differ materially from what is expressed or forecasted in the forward-looking statements due to numerous factors, including those described above and those risks discussed from time to time in this report, including the risks described under "Risk Factors" and any risks described in any other filings we make with the SEC. Any forward-looking statements speak only as of the date on which they are made, and we do not undertake any obligation to update any forward-looking statement to reflect events or circumstances after the date of this report.

Our discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. On an on-going basis, we evaluate these estimates, including those related to useful lives of real estate assets, cost reimbursement income, bad debts, impairment, net lease intangibles, contingencies and litigation. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. There can be no assurance that actual results will not differ from those estimates.

PART I

ITEM 1. BUSINESS

Cemtrex Inc. ("Cemtrex" or the "Company") is a Delaware corporation that designs, engineers, assembles and sells emission monitoring equipment and instruments through its MIP division to measure opacity, mercury, sulfur oxides, hydrocarbons, nitrogen oxides, ammonia, carbon dioxide and oxygen in flue gases discharging the stacks in industries such as: chemicals, pulp and paper, steel, power, cement, coal and petrochemical. Cemtrex also markets technologies for controlling greenhouse gases such as Methane from coal mines. The Company sells air filtration and environmental control products through its subsidiary Griffin Filters LLC.

On April 27, 1998, the Company was incorporated in the state of Delaware under the name "Diversified American Holdings, Inc." The Company subsequently changed its name to "Cemtrex Inc." on December 16, 2004.

The Company designs, engineers, assembles and sells emission monitoring equipment and instruments to the chemicals, pulp and paper, steel, power, coal and petrochemical industries, as well as to municipalities, hospitals, and state and federal governments. Our emission monitoring systems are installed at the exhaust stacks of industrial facilities and are used to measure the outlet flue gas concentrations of regulated pollutants, such as sulfur dioxide, hydrogen chloride, hydrogen sulfide, nitrous oxides, ammonia, nitrogen oxide, carbon dioxide, carbon monoxide and other regulated pollutants. Through use of our equipment and instrumentation, our clients can monitor the exhausts to the atmosphere from their facilities and comply with Environmental Protection Agency and state and local emission regulations on dust, particulate, fumes, acid gases and other regulated pollutants into the atmosphere.

Company also markets MCDR technology for generating carbon credits from control of Methane from coal mines. MCDR technology utilizes proprietary catalyst to oxidize methane at lower temperatures thus making it economical to destroy methane in ventilation air from coal mines.

The Company through its subsidiary Griffin Filters provides a complete line of air filtration and environmental control equipment to industries such as: chemical, cement, steel, food, construction, mining, & petrochemical. Griffin's equipment is used to: (i) remove dust, corrosive fumes, mists, hydrocarbons, volatile organic compounds, submicron particles and particulate from industrial exhausts and boilers; (ii) clean noxious and acid gases such as sulfur dioxide, hydrogen chloride, hydrogen sulfide, chlorides, and organics from industrial exhaust stacks prior to discharging to the atmosphere; (iii) control emissions of coal, dust, sawdust, phosphates, flyash, cement, carbon black, soda ash, silica, etc. from construction facilities, mining operations and dryer exhausts.

INDUSTRY BACKGROUND

The market for environmental control systems and emission monitoring technologies is directly dependent upon governmental regulations and their enforcement. During the past three decades, federal, state and local governments have realized the contaminated air poses significant threats to public health and safety, and, in response, have enacted legislation designed to curb emissions of a variety of air pollutants. Management believes that the existence of governmental regulations creates demand for Company's emission monitoring equipment and environmental control systems.

These governmental regulations affect nearly every industrial activity. The principal federal legislation that was created is the Clean Air Act of 1970, as amended (the Clean Air Act). This legislation requires compliance with ambient air quality standards and empowers the Environmental Protection Agency (EPA) to establish and enforce limits on the emissions of various pollutants from specific types of facilities. The states have primary responsibility for implementing these standards and, in some cases, have adopted standards more stringent than those established by the EPA. In 1990, amendments to the Clean Air Act were adopted which address, among other things, the country acid rain problem by imposing strict control on the emissions of sulfur dioxide from power plants. During 1997, EPA approved regulations for ozone related emissions and in 1998 EPA issued regulations requiring utilities in 22 states to significantly reduce Nitrogen oxides emissions.

According to certain scientists, the Earth's surface has risen in temperature by about 1 degree Fahrenheit in the past century. There is increasing evidence that certain human activities are contributing to this change in temperature through activities that increase the levels of greenhouse gases, primarily carbon dioxide, methane, and nitrous oxide, in the atmosphere. Greenhouse gases trap heat that would normally escape back into the atmosphere, thus increasing the earth's natural greenhouse effect and increasing temperature over time.

The earth's climate is predicted by certain scientists to change because human activities are altering the chemical composition of the atmosphere through the buildup of greenhouse gases—primarily carbon dioxide (CO₂), methane (CH₄), and nitrous oxide (NO_x). The heat-trapping property of these gases is undisputed. Although uncertainty exists about exactly how earth's climate responds to these gases, global temperatures are rising.

EPA Clean Air market Programs

EPA's Clean air market programs include various market-based regulatory programs designed to improve air quality. Clean air markets include various market-based regulatory programs designed to improve air quality by reducing outdoor concentrations of fine particles, sulfur dioxide, nitrogen oxides, mercury, ozone and other significant air emissions. The most well-known of these programs are EPA's Acid Rain Program and the NO_x Trading Programs, which reduce emissions of sulfur dioxide (SO₂) and nitrogen oxides (NO_x)—compounds produced by fossil fuel combustion.

Acid Rain Program

The goal of the Acid Rain Program is to achieve significant environmental and public health benefits through reductions in emissions of sulfur dioxide (SO₂) and nitrogen oxides (NO_x), the primary causes of acid rain. To achieve this goal at the lowest cost to society, the program employs both traditional and innovative, market-based approaches for controlling air pollution. In addition, the program encourages energy efficiency and pollution prevention.

"Acid rain" is a broad term referring to a mixture of wet and dry deposition (deposited material) from the atmosphere containing higher than normal amounts of nitric and sulfuric acids. The precursors, or chemical forerunners, of acid rain formation result from both natural sources, such as volcanoes and decaying vegetation, and man-made sources, primarily emissions of SO₂ and NO_x resulting from fossil fuel combustion. In the United States, roughly 2/3 of all SO₂ and 1/4 of all NO_x come from electric power generation that relies on burning fossil fuels, like coal. Acid rain occurs when these gases react in the atmosphere with water, oxygen, and other chemicals to form various acidic compounds. The result is a mild solution of sulfuric acid and nitric acid. When sulfur dioxide and nitrogen oxides are released from power plants and other sources, prevailing winds blow these compounds across state and national borders, sometimes over hundreds of miles.

NO_x Trading Program

The goal of the NO_x Trading Program is to reduce the transport of ground-level ozone across large distances. The Ozone Transport Commission (OTC) NQ Budget Program was implemented from 1999 to 2002 and was replaced by the NO_x Budget Trading Program—also known as the "NO_x SIP Call"—in 2003. The NO_x SIP Call Program is a market-based cap and trade program created to reduce emissions of nitrogen oxides (NO_x) from power plants and other large combustion sources in the eastern United States. NO_x is a prime ingredient in the formation of ground-level ozone (smog), a pervasive air pollution problem in many areas of the eastern United States. The NO_x Budget Trading Program was designed to reduce NO_x emissions during the warm summer months, referred to as the ozone season, when ground-level ozone concentrations are highest.

Clean Air Interstate Rule (CAIR)

On March 10, 2005, EPA issued the Clean Air Interstate Rule (CAIR). This rule provides states with a solution to the problem of power plant pollution that drifts from one state to another. CAIR covers 28 eastern states and the District of Columbia. The rule uses a cap and trade system to reduce the target pollutants—sulfur dioxide (SO₂) and nitrogen oxides (NO_x)—by 70 percent.

The goal of the Clean Air Interstate Rule (CAIR) is to permanently cap emissions of SO₂ and NO_x in the eastern U.S. States must achieve the required emission reductions using one of two compliance options: (1) meet the state's emission budget by requiring power plants to participate in an EPA-administered interstate cap and trade system, or (2) meet an individual state emissions budget through measures of the state's choosing.

EPA Emission Monitoring Requirements

EPA's emissions monitoring requirements are designed to ensure the compliance with its current regulations pursuant to various programs. The emission monitoring requirements ensure that the emissions data collected is of a known, consistent, and high quality, and that the mass emissions data from source to source are collected in an equitable manner. This is essential to support the Clean Air Markets Program's mission of promoting market-based trading programs as a means for solving air quality problems

Continuous emissions monitoring (CEM) is instrumental in ensuring that the mandated reductions of SO₂, NO_x mercury and other pollutants are achieved. While traditional emissions limitation programs have required facilities to meet specific emissions rates, the current Program requires an accounting of each ton of emissions from each regulated unit. Compliance is then determined through a direct comparison of total annual emissions reported by CEM and allowances held for the unit.

CEM is the continuous measurement of pollutants emitted into the atmosphere in exhaust gases from combustion or industrial processes. EPA has established requirements for the continuous monitoring of SO₂, volumetric flow, NO_x, diluent gas, and opacity for units regulated under the Acid Rain Program. In addition, procedures for monitoring or estimating carbon dioxide (CO₂) are specified. The CEM rule also contains requirements for equipment performance specifications, certification procedures, and recordkeeping and reporting.

The Acid Rain Program uses a market-based approach to reduce SO₂ emissions in a cost-effective manner. (One allowance is an authorization to emit 1 ton of SO₂ during or after a specified calendar year; a utility may buy, sell, or hold allowances as part of its compliance strategy.) Complete and accurate emissions data are key to implementing this market-based approach.

An essential feature of smoothly operating markets is a method for measuring the commodity being traded. The CEM data supplies the gold standard to back up the paper currency of emissions allowances. The CEM requirement, management believes, instills confidence in the market-based approach by verifying the existence and value of the traded allowance.

The owner or operator of a unit regulated under the Acid Rain Program must install CEM systems on the unit unless otherwise specified in the regulation. CEM systems include:

- An SO₂ pollutant concentration monitor.
- A NO_x pollutant concentration monitor.
- A volumetric flow monitor.
- An opacity monitor.
- A diluent gas (O₂ or CO₂) monitor.
- A computer-based data acquisition and handling system (DAHS) for recording and performing calculations with the data.

All CEM systems must be in continuous operation and must be able to sample, analyze, and record data at least every 15 minutes. All emissions and flow data will be reduced to 1-hour averages. The rule specifies procedures for converting the hourly emissions data into the appropriate units of measure.

The following is a summary of monitoring method requirements and options:

- All existing coal-fired units serving a generator greater than 25 megawatts and all new coal units must use CEMs for SO₂, NO_x, flow, and opacity.
- Units burning natural gas may determine SO₂ mass emissions by: (1) measuring heat input with a gas flowmeter and using a default emission rate; or (2) sampling and analyzing gas daily for sulfur and using the volume of gas combusted; or (3) using CEMs.
- Units burning oil may monitor SO₂ mass emissions by one of the following methods:
 1. daily manual oil sampling and analysis plus oil flow meter (to continuously monitor oil usage)
 2. sampling and analysis of diesel fuel oil as-delivered plus oil flow meter
 3. automatic continuous oil sampling plus oil flow meter
 4. SO₂ and flow CEMs.
- Gas-fired and oil-fired base-loaded units must use NO_x CEMs.
- Gas-fired peaking units and oil-fired peaking units may either estimate NO_x emissions by using site-specific emission correlations and periodic stack testing to verify continued representativeness of the correlations, or use NO_x CEMs. The emission correlation method has been significantly streamlined in the revised rule.
- All gas-fired units using natural gas for at least 90 percent of their annual heat input and units burning diesel fuel oil are exempt from opacity monitoring.

For CO₂ all units can use either (1) a mass balance estimation, or (2) CO₂ CEMs, or (3) O₂ CEMs in order to estimate CO₂ emissions.

PRODUCTS

The Company offers a range of products and systems, incorporating diverse technologies, to address the needs of a wide variety of industries and their environmental regulations. Management believes that the Company provides a single source responsibility for design, engineering, assembly, installation and maintenance of systems to its customers. The Company's products are designed to operate so as to allow its users to determine their compliance with the latest governmental emissions regulations. The Company's products measure the concentrations of various regulated pollutants in the flue gases discharging the exhaust stacks at various utilities and industries.

The current products include the following:

Opacity monitor: Compliance & non-compliance types

Management believes that the Company's Laser Opacity monitor provides the highest accuracy and long-term reliability available for stack opacity and dust measurements. An EPA-compliant monitoring system, the monitor is a lightweight, efficient solution for determining opacity or dust concentration in stack gases. Proven in many installations worldwide, it advances the state of opacity monitoring with higher levels of accuracy, flexible installation and reduced long-term maintenance

Extractive Continuous Emission Monitors (CEMS)

Cemtrex provides direct-extractive and dilution-extractive CEMS equipment & systems that are applicable for utilities, industrial boilers, FGD systems, SCR-NO_x control, furnaces, gas turbines, process heaters, incinerators, and process controls. In addition to traditional CEMS designed for maximum reliability and minimal maintenance in monitoring criteria pollutants, the Company can also accurately quantify other gaseous compounds through in-situ or extractive FTIR systems. The Company's Extractive CEMS can be configured to monitor for one or all of the following: • NO_x • SO₂ • CO₂ • O₂ • CO • THC • Mercury • H₂S • HCl & HF Acid • NH₃ • Particulate • Opacity • Volumetric Flow and Moisture.

Ammonia Analyzer

The flue gas stream which contains ammonia, nitrogen oxides and in some cases sulfur dioxide utilize Ultra Violet radiation techniques for measurements. All these components absorb UV radiation, and therefore can be monitored by process analyzers that utilize UV absorbance techniques for detection.

The Company through its subsidiary, Griffin Filters, provides a complete line of air filtration and environmental control equipment to industries such as: chemical, cement, steel, food, construction, mining, & petrochemical. Griffin's equipment is used to: (i) remove dust, corrosive fumes, mists, hydrocarbons, volatile organic compounds, submicron particles and particulate from industrial exhausts and boilers; (ii) clean noxious and acid gases such as sulfur dioxide, hydrogen chloride, hydrogen sulfide, chlorides, and organics from industrial exhaust stacks prior to discharging to the atmosphere; (iii) control emissions of coal, dust, sawdust, phosphates, flyash, cement, carbon black, soda ash, silica, etc. from construction facilities, mining operations and dryer exhausts.

SUPPLIERS

The Company is not dependent on, nor expects to become dependent on, any one or a limited number of suppliers. The Company buys parts and components to assemble its equipment and products. The Company does not manufacture or fabricate its own products or systems. The Company relies on sub-suppliers and third party vendors to procure from or fabricate its components based on its design, engineering and specifications. The Company also enters into subcontracts for field installation, which the Company supervises; and the Company manages all technical, physical and commercial aspects of the performance of the Company contracts. To date, the Company has not experienced difficulties either in obtaining fabricated components and other materials and parts or in obtaining qualified subcontractors for installation work.

PARTS, REPAIR AND REFURBISHMENT SERVICES

The Company also provide replacement and spare parts and repair and refurbishment services for our emission monitoring systems following the expiration of our warranties which generally range up to 12 months. The Company has experienced only minimal costs from its warranties.

The Company's standard terms of sale disclaim any liability for consequential or indirect losses or damages stemming from any failure of our products or systems or any component thereof. The Company seeks indemnification from its subcontractors for any loss, damage or claim arising from the subcontractors' failure to perform.

COMPETITION

The Company faces substantial competition in each of its principal markets. Most of its competitors are larger and have greater financial resources than the Company; several are divisions of multi-national companies. The Company competes on the basis of price, engineering and technological expertise, know-how and the quality of our products, systems and services. Additionally, the Company's management believes that the successful performance of the Company's installed products and systems is a key factor in gaining business as customers typically prefer to make significant purchases from a company with a solid performance history.

We obtain virtually all our contracts through competitive bidding. Although price is an important factor and may in some cases be the governing factor, it is not always determinative, and contracts are often awarded on the basis of the efficiency or reliability of products and the engineering and technical expertise of the bidder. Several companies market products that compete directly with our products. Other companies offer products that potential customers may consider to be acceptable alternatives to our products and services. We face direct competition from companies with far greater financial, technological, manufacturing and personnel resources, including Thermo Fisher Scientific Inc., Tekran Instruments Corporation, Altech Environment USA, Shaw Group, and Horiba Instruments Inc. in the emissions monitoring business.

INTELLECTUAL PROPERTY

Over the years, the Company has developed proprietary technologies that give us an edge in competing with its competitors. Thus, the Company relies on a combination of trade secrets and know-how to protect its intellectual property. The Company has not filed any patents.

MARKETING

The Company sells its products globally and relies on manufacturing representatives, distributors, commission sales agents, magazine advertisements, internet advertising, trade shows, trade directories and catalogue listings to market our products and services. The Company uses more than eight manufacturing sales representatives in the United States backed by our senior management and technical professionals. The Company's arrangements with independent sales representatives accord each a defined territory within which to sell some or all of our products and systems, provide for the payment of agreed-upon sales commissions and are terminable at will. The Company's sales representatives do not have authority to execute contracts on the Company's behalf.

The Company's sales representatives also serve as ongoing liaison function between us and our customers during the installation phase of our products and systems and address customers' questions or concerns arising thereafter. The Company selects representatives based upon industry reputation, prior sales performance including number of prospective leads generated and sales closure rates, and the breadth of territorial coverage, among other criteria.

Technical inquiries received from potential customers are referred to our engineering personnel. Thereafter, the Company's sales and engineering personnel jointly prepare a budget for future planning, a proposal, or a final bid. The period between initial customer contact and issuance of an order is generally between two and twelve months.

CUSTOMERS

The Company's principal customers are engaged in refining, power, chemical, mining and metallurgical processing. Historically, most of our customers have purchased individual products or systems which, in many instances, operate in conjunction with products and systems supplied by others. For several years, the Company has marketed its products as integrated custom engineered emission monitoring systems and environmental management solutions. No one single customer accounts for a large percentage of our annual sales.

On most projects, the Company is responsible to its customers for all phases of the design, assembly, supply and, if included, field installation of its products and systems. The successful completion of a project is generally determined by a successful operational test of the supplied equipment conducted by our field service technician in the presence of the customer.

TECHNOLOGY

The Company has developed a broad range of emission monitoring technological base. The Company's equipment and instruments are used to measure: (i) particulate, carbon dioxide, nitrogen oxides, and sulfur dioxide from coal-fired power plants, (ii) particulate from cement plants, (iii) hydrocarbons, particulate and sulfur dioxide from refineries, (iv) hydrogen sulfide, carbon monoxide, ammonia, hydrocarbons and other regulated pollutants from chemical plants, steel plants, incinerators and other industrial exhausts. Our emission monitors are capable of meeting all current federal and local emission monitoring standards. Company also markets technologies for control of Methane from coal mines. The Company has not filed any patents with respect to its technology.

BONDING AND INSURANCE

While only a very few of our contracts require the Company to procure bid and performance bonds, such requirements are prevalent for large projects or projects partially or fully funded by federal, state or local governments. A bid bond guarantees that a bidder will execute a contract if it is awarded the job and a performance bond guarantees performance of the contract. The Company does not presently have a bank credit line to back bid or performance bonds. Thus, the Company cannot bid on certain contracts.

In certain cases, the Company is able to secure large contracts by accepting progress payments with retention provisions in lieu of bonds.

The Company currently maintains different types of insurance, including general liability and property coverage. The Company does not maintain product liability insurance with respect to its products and equipment. Management believes that the insurance coverage that it is adequate for our current business needs.

GOVERNMENT REGULATION

Significant environmental laws, particularly the Federal Clean Air Act, have been enacted in response to public concern about the environment. The Company believe that compliance with and enforcement of these laws and regulations create the demand for our products and systems and largely determine the level of expenditures that customers will make to monitor the emissions from their facilities. The Federal Clean Air Act, initially adopted in 1970 and extensively amended in 1990, requires compliance with ambient air quality standards and empowers the EPA to establish and enforce limits on the emission of various pollutants from specific types of industrial facilities. States have primary responsibility for implementing these standards, and, in some cases, have adopted more stringent standards.

The 1990 amendments to the Federal Clean Air Act require, among other matters, reductions in the emission of sulfur oxides, believed to be the cause of "acid rain," in the emission of 189 identified hazardous air pollutants and toxic substances and the installation of equipment and systems which will contain certain named toxic substances used in industrial processes in the event of sudden, accidental, high-volume releases. Such amendments also extend regulatory coverage to many facilities previously exempt due to their small size and require the EPA to identify those industries which will be required to install the mandated control technology for the industry to reduce the emission of hazardous air pollutants from their respective plants and facilities. The Montreal Protocol, adopted in 1987, as well as EPA regulations issued in 1992, call for the phase-out of CFCs. In addition, regulations promulgated by the EPA in 1993 further limit the concentration of pollutants, such as hydrogen chloride, sulfur dioxide, chlorine, heavy metals and hazardous solid substances in the form of extremely fine dust, from sewage sludge incinerators. Sewage sludge facilities are required to comply with these regulations. Compliance with all these regulations can only be achieved by first monitoring the pertinent emission levels.

EMPLOYEES

The Company employs eleven (11) full time and three part time employees, consisting of three executive officers, three managers, three (3) technical engineers, and one clerical and administrative support persons. None of our employees are represented by a labor union. In addition, the Company utilizes commission sales personnel and contract design engineers, on an as needed basis. There are no employment agreements.

FACILITIES

The Company does not own any real estate. The Company leases its principal office at Farmingdale, New York, 4000 square feet of office and warehouse/shop space in a single story commercial structure on a month to month lease from Ducon Technologies Inc., at a monthly rental of 2,157.00. The Company's subsidiary Griffin Filters LLC leases approx. 10,000 sq. ft. of office and warehouse space in Liverpool, New York from a third party in a five year lease at a monthly rent of \$ 2,850.00 expiring on March 30, 2012. The Company has no plans to acquire any property in the immediate future. The Company believes that its current facilities are adequate for its needs through the next nine months, and that, should it be needed, suitable additional space will be available to accommodate expansion of the Company's operations on commercially reasonable terms, although there can be no assurance in this regard. There are no written agreements

ITEM 1A. RISK FACTORS

Investing in our common stock involves a high degree of risk. You should consider carefully the risks and uncertainties described below, together with all of the other information in this report, including the consolidated financial statements and the related notes appearing at the end of this annual report on Form 10-K, with respect to any investment in shares of our common stock. If any of the following risks actually occurs, our business, financial condition, results of operations and future prospects would likely be materially and adversely affected. In that event, the market price of our common stock could decline and you could lose all or part of your investment.

RISKS RELATED TO OUR BUSINESS

- o We are substantially dependent upon the success and market acceptance of our technology. The failure of the emissions monitoring and controls market to develop as we anticipate, would adversely affect our business.

The Company's success is largely dependent on increased market acceptance of our emission monitoring equipment and control systems. If acceptance of emissions monitoring equipment does not continue to grow, then the Company's revenues may be significantly reduced.

- o If we are unable to develop new products, our competitors may develop and market products with better features that may reduce demand for our potential products.

The Company may not be able to introduce any new products or any enhancements to its existing products on a timely basis, or at all. In addition, the introduction by the Company of any new products could adversely affect the sales of certain of its existing products. If the Company's competitors develop innovative emissions testing technology that are superior to the Company's products or if the Company fails to accurately anticipate market trends and respond on a timely basis with its own innovations, the Company may not achieve sufficient growth in its revenues to attain profitability.

o Even though we have a profit for the fiscal year ending September 30, 2011, and we may not incur profit for the foreseeable future. We had net income of \$1,010,882 for the year ended September 30, 2011 and a net loss of \$1,028,682 for the fiscal year ended September 30, 2010. We continue to incur significant expenditures related to selling and marketing and general and administrative activities as well as capital expenditures and anticipate that our expenses and losses may increase in the foreseeable future as we expand our business. Further, as a public company we will also incur significant legal, accounting and other expenses that we did not incur as a private company. To maintain profitability, we will need to generate significant additional revenues with significantly improved gross margins. It is uncertain whether we will be able to maintain our profitability.

o The Company faces constant changes in governmental standards by which our products are evaluated.

The Company believes that, due to the constant focus on the environment and clean air standards throughout the world, a requirement in the future to adhere to new and more stringent regulations both domestically and abroad is possible as governmental agencies seek to improve standards required for certification of products intended to promote clean air. In the event our products fail to meet these ever-changing standards, some or all of our products may become obsolete.

o The future growth of our business depends, in part, on enforcement of existing emissions-related environmental regulations and further tightening of emission standards worldwide.

The Company expects that the future business growth will be driven, in part, by the enforcement of existing emissions-related environmental regulations and tightening of emissions standards worldwide. If such standards do not continue to become stricter or are loosened or are not enforced by governmental authorities, it could have a material adverse effect on our business, operating results, financial condition and long-term prospects.

o We may incur substantial costs enforcing our proprietary information, defending against third-party patents, invalidating third-party patents or licensing third-party intellectual property, as a result of litigation or other proceedings relating to patent and other intellectual property rights.

The Company considers its technology and procedures proprietary. In particular, the Company depends substantially on its flexibility to develop custom engineered solutions for various applications and be responsive to customer needs. The Company has not filed for any patents for its technologies.

The Company may be notified of claims that it has infringed a third party's intellectual property. Even if such claims are not valid, they could subject the Company to significant costs. In addition, it may be necessary in the future to enforce the Company's intellectual property rights to determine the validity and scope of the proprietary rights of others. Litigation may also be necessary to defend against claims of infringement or invalidity by others. An adverse outcome in litigation or any similar proceedings could force the Company to take actions that could harm its business. These include: (i) ceasing to sell products that contain allegedly infringing property; (ii) obtaining licenses to the relevant intellectual property which the Company may not be able to obtain on terms that are acceptable, or at all; (iii) indemnifying certain customers or strategic partners if it is determined that the Company has infringed upon or misappropriated another party's intellectual property; and (iv) redesigning products that embody allegedly infringing intellectual property. Any of these results could adversely affect the Company's business, financial condition and results of operations. In addition, the cost of defending or asserting any intellectual property claim, both in legal fees and expenses, and the diversion of management resources, regardless of whether the claim is valid, could be significant.

o Product defects could cause the Company to incur significant product liability, warranty, repair and support costs and damage its reputation which would have a material adverse effect on its business.

Although the Company rigorously tests its products, defects may be discovered in future or existing products. These defects could cause the Company to incur significant warranty, support and repair costs and divert the attention of its research and development personnel. It could also significantly damage the Company's reputation and relationship with its distributors and customers which would adversely affect its business. In addition, such defects could result in personal injury or financial or other damages to customers who may seek damages with respect to such losses. A product liability claim against the Company, even if unsuccessful, would likely be time consuming and costly to defend.

- o The markets in which we operate are highly competitive, and many of our competitors have significantly greater resources than we do.

There is significant competition among companies that provide emissions monitoring systems. Several companies market products that compete directly with our products. Other companies offer products that potential customers may consider to be acceptable alternatives to our products and services. We face direct competition from companies with far greater financial, technological, manufacturing and personnel resources, including Thermo Fisher Scientific Inc., Tekran Instruments Corporation, Altech Environment USA, Shaw Group, and Horiba Instruments Inc. in the emissions monitoring business. Newly developed products could be more effective and cost efficient than our current or future products. Many of the current and potential future competitors have substantially more engineering, sales and marketing capabilities and broader product lines than we have.

- o The Company's results may fluctuate due to certain regulatory, marketing and competitive factors over which we have little or no control.

The factors listed below, some of which we cannot control, may cause our revenue and results of operations to fluctuate significantly:

- the existence and enforcement of government environmental regulations. If these regulations are not maintained or enforced then the market for Company's products could deteriorate;
- Retaining and keeping qualified employees and management personnel;
- Ability to upgrade our products to keep up with the changing market place requirements;
- Ability to keep up with our competitors who have much higher resources than us;
- Ability to find sub-suppliers and sub-contractors to assemble and install our products;
- General economic conditions of the industry and the ability of potential customers to spend money on setting up new industries that require our products;
- Ability to maintain or raise adequate working capital required for the operations and future growth; and
- Ability to retain our CEO and other senior key personnel.

- o The loss of our senior management and failure to attract and retain qualified personnel in a competitive labor market could limit our ability to execute our growth strategy, resulting a slower rate of growth.

We depend on the continued service of our senior management. Due to the nature of our business, we may have difficulty locating and hiring qualified personnel and retaining such personnel once hired. The loss of the services of any of our key personnel, or our failure to attract and retain other qualified and experienced personnel on acceptable terms, could limit our ability to execute our growth strategy resulting in a slower rate of growth.

- o General economic downturns in general would have a material adverse effect on the Company's business, operating results and financial condition.

The Company's operations may in the future experience substantial fluctuations from period to period as a consequence of general economic conditions affecting consumer spending. Therefore, any economic downturns in general would have a material adverse effect on the Company's business, operating results and financial condition.

RISKS RELATED TO INVESTMENT IN THE COMMON STOCK OF THE COMPANY

o We may need additional funds in the future. We may be unable to obtain additional funds or if we obtain financing it may not be on terms favorable to us. You may lose your entire investment.

Based on our current plans, we believe our existing cash and cash equivalents along with cash generated from operations may be sufficient to fund our operating expenses and capital requirements through September 30, 2012, although there is no assurance of this result, we may need funds in the future. If our capital resources are insufficient to meet future capital requirements, we will have to raise additional funds by selling Company shares. If we are unable to obtain additional funds on terms favorable to us, we may be required to cease or reduce our operating activities.

o If we raise additional funds by selling additional shares of our capital stock, the ownership interests of our stockholders will be substantially diluted.

o Our stock trades on the Over the Counter Bulletin Board quotation system.

The Company's Common Stock currently trades on the Over the Counter Bulletin Board electronic quotation system under the symbol "CTEI.OB". The Over the Counter Bulletin Board is a decentralized market regulated by the Financial Industry Regulatory Authority in which securities are traded via an electronic quotation system. There can be no assurance that a trading market for the Company's shares will continue to exist in the future, and there can be no assurance that an active trading market will develop or be sustained. The market price of the shares of Common Stock is likely to be highly volatile and may be significantly affected by factors such as actual or anticipated fluctuations in the Company's operating results, announcements of technological innovations, new products or new contracts by the Company or its competitors, developments with respect to proprietary rights, adoption of new government regulations affecting the environment, general market conditions and other factors. In addition, the stock market has from time to time experienced significant price and volume fluctuations that have particularly affected the market price for the common stocks of technology companies. These types of broad market fluctuations may adversely affect the market price of the Company's common stock. *See* Risk Factor "Our stock price may be highly volatile" below.

o Our shares of common stock are thinly traded, so stockholders may be unable to sell at or near ask prices or at all if they need to sell shares to raise money or otherwise desire to liquidate their shares.

Our common stock has from time to time been "thinly-traded," meaning that the number of persons interested in purchasing our common stock at or near ask prices at any given time may be relatively small or non-existent. This situation is attributable to a number of factors, including the fact that we are a small company that is relatively unknown to stock analysts, stock brokers, institutional investors and others in the investment community that generate or influence sales volume, and that even if we came to the attention of such persons, they tend to be risk-averse and would be reluctant to follow an unproven company such as ours or purchase or recommend the purchase of our shares until such time as we become more seasoned and viable. As a consequence, there may be periods of several days or more when trading activity in our shares is minimal or non-existent, as compared to a seasoned issuer which has a large and steady volume of trading activity that will generally support continuous sales without an adverse effect on share price. We cannot give stockholders any assurance that a broader or more active public trading market for our common shares will develop or be sustained, or that current trading levels will be sustained.

o Our common stock will be subject to "penny stock" rules which may be detrimental to investors.

If our common stock is not listed on a national exchange or market, the trading market for our common stock may become illiquid. Our common stock trades on the over-the-counter electronic bulletin board and, therefore, is subject to the requirements of certain rules promulgated under the Securities Exchange Act of 1934, which require additional disclosure by broker-dealers in connection with any trades involving a stock defined as a "penny stock". The Securities and Exchange Commission has adopted regulations which generally define "penny stock" to be any equity security that has a market price (as defined) of less than \$5.00 per share or an exercise price of less than \$5.00 per share. The securities will become subject to rules that impose additional sales practice requirements on broker-dealers who sell such securities. For transactions covered by these rules, the broker-dealer must make a special suitability determination for the purchaser of such securities and have received the purchaser's written consent to the transaction prior to the purchase. Additionally, for any transaction involving a penny stock, unless exempt, the rules require the delivery, prior to the transaction, of a disclosure schedule prepared by the Securities and Exchange Commission relating to the penny stock market. The broker-dealer also must disclose the commissions payable to both the broker-dealer and the registered representative, current quotations for the securities and, if the broker-dealer is the sole market-maker, the broker-dealer must disclose this fact and the broker-dealer's presumed control over the market. Finally, among other requirements, monthly statements must be sent disclosing recent price information for the penny stock held in the account and information on the limited market in penny stocks. Consequently, the "penny stock" rules may restrict the ability of purchasers in this offering to sell the Common Stock offered hereby in the secondary market.

o We do not anticipate paying any dividends.

No dividends have been paid on the common stock of the Company. The Company does not intend to pay cash dividends on its common stock in the foreseeable future, and anticipates that profits, if any, received from operations will be devoted to the Company's future operations. Any decision to pay dividends will depend upon the Company's profitability at the time, cash available and other relevant factors.

o Our stock price may be highly volatile.

The market price of our common stock, like that of many other technology companies, has been highly volatile and may continue to be so in the future due to a wide variety of factors, including:

- announcements of technological innovations by us, our collaborative partners or our present or potential competitors;
- our quarterly operating results and performance;
- developments or disputes concerning patents or other proprietary rights;
- acquisitions;
- litigation and government proceedings;
- adverse legislation;
- changes in government regulations;
- economic and other external factors; and
- general market conditions.

In addition, potential dilutive effects of future sales of shares of common stock by shareholders and by the Company could have an adverse effect on the market price of our shares.

o Our principal shareholder has significant influence over our company which could make it impossible for the public stockholders to influence the affairs of the Company.

Approximately 65% of our outstanding voting equity is beneficially held by Arun Govil the Company's Chairman, as a result of Mr. Govil's common stock and Series A preferred stock ownership. Consequently, Mr. Govil will be able to control substantially all matters requiring approval by the stockholders of the Company, including the election of all directors and approval of significant corporate transactions. This makes it impossible for the public stockholders to influence the affairs of the Company.

ITEM 2. PROPERTIES

The Company does not own any real estate.

The Company leases its principal office at Farmingdale, New York, 4000 square feet of office and warehouse/shop space in a single story commercial structure on a month to month lease from Ducon Technologies Inc., at a monthly rental of 2,157.00. The Company's subsidiary Griffin Filters LLC leases approx. 10,000 sq. ft. of office and warehouse space in Liverpool, New York from a third party in a five year lease at a monthly rent of \$ 2,850.00 expiring on March 30, 2012. The Company has no plans to acquire any property in the immediate future. The Company believes that its current facilities are adequate for its needs through the next six months, and that, should it be needed, suitable additional space will be available to accommodate expansion of the Company's operations on commercially reasonable terms, although there can be no assurance in this regard. There are no written agreements.

ITEM 3. LEGAL PROCEEDINGS

None.

PART II**ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

The Company's Common Stock currently trades on the Over the Counter Bulletin Board electronic quotation system under the symbol "CTEL.OB".

As of December 26, 2011, there were approximately 40,599,129 holders of record of the Company's common stock as determined from the Company's transfer agent's list. Such list does not include beneficial owners of securities whose shares are held in the names of various dealers and clearing agencies.

The Company is authorized to issue 60,000,000 shares of common stock, \$0.001 par value per share. On December 26, 2011, there were 40,599,129 shares of common stock issued and outstanding and 1,000,000 shares of Series A preferred stock issued or outstanding.

The Company's Common Stock trades on the over-the-counter bulletin board trading system. The price ranges presented below represent the highest and lowest quoted bid prices during the third and fourth calendar quarters for 2009, 2010 and 2011 reported by the exchange. The quotes represent prices between dealers and do not reflect mark-ups, markdowns or commissions and therefore may not necessarily represent actual transactions.

Common Stock

Year	Period	Stock Price	
		High	Low
2011	4 th Quarter	\$ 0.28	\$ 0.11
	3 rd Quarter	\$ 0.3488	\$ 0.11
	2 nd Quarter	\$ 0.3	\$ 0.0221
	1 st Quarter	\$ 0.0891	\$ 0.021
2010	4 th Quarter	\$ 0.13	\$ 0.02
	3 rd Quarter	\$ 0.198	\$ 0.10
	2 th Quarter	\$ 0.44	\$ 0.14
	1 st Quarter	\$ 0.50	\$ 0.24
2009	4 th Quarter	\$ 0.53	\$ 0.24
	3 rd Quarter	\$ 0.64	\$ 0.45
	2 nd Quarter	\$ 0.75	\$ 0.17
2009	1 th Quarter	\$ 0.22	\$ 0.008

As reported by the over-the-counter Pink Sheets, on December 20, 2011 the closing sales price of the Company's Common Stock was \$0.285 per share.

The Company has not declared or paid any cash dividends on its common stock nor does it anticipate paying any in the foreseeable future. Furthermore, the Company expects to retain any future earnings to finance its operations and expansion. The payment of cash dividends in the future will be at the discretion of its Board of Directors and will depend upon its earnings levels, capital requirements, any restrictive loan covenants and other factors the Board considers relevant.

The Company has no equity compensation plans.

ITEM 6. SELECTED FINANCIAL DATA

Not required for Smaller Reporting Companies

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of our financial condition and plan of operations should be read in conjunction with the consolidated financial statements and the notes to those statements included elsewhere in this prospectus. This discussion includes forward-looking statements that involve risks and uncertainties. As a result of many factors, such as those set forth under "risk factors" and elsewhere in this prospectus, our actual results may differ materially from those anticipated in these forward-looking statements.

OVERVIEW

Centrex, Inc is an environmental technologies company engaged in manufacturing and selling instruments for emission monitoring products for the industry. The Company's Griffin Filters subsidiary sells air filtration and environmental control products to power plants, refineries, chemical plants, cement plants and other industries, including federal and state governmental agencies.

Financial condition

The following table sets forth selected historical consolidated financial data from our consolidated financial statements and should be read in conjunction with our consolidated financial statements including the related notes and "Management's Discussion and Analysis of Financial Condition and Results of Operations" which are included below.

	Year Ended September 30,	
	2011	2010
Revenues	\$ 13,732,153	\$ 3,304,055
Operating Expenses	\$ 1,027,407	\$ 2,393,496
Net Income (Loss)	\$ 1,010,882	\$ (1,028,682)
Net Income (Loss) Per Common Share, Basic and Diluted	\$ 0.02	\$ (.03)
Weighted Average Number of Shares	39,772,862	39,772,862
	September 30,	
	2011	2010
Current Assets	\$ 1,257,988	\$ 1,164,757
Total Assets	\$ 2,429,119	\$ 1,231,255
Total Liabilities	\$ 2,334,633	\$ 2,147,651
Total Stockholders' Equity(Deficit)	\$ 94,486	\$ (916,396)

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The following discussion and analysis is based upon our consolidated financial statements which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of our financial statements requires management to make estimates and assumptions that affect the reported amounts of revenues and expenses, and assets and liabilities during the periods reported. Estimates are used when accounting for certain items such as revenues, allowances for returns, early payment discounts, customer discounts, doubtful accounts, employee compensation programs, depreciation and amortization periods, taxes, inventory values, and valuations of investments, goodwill, other intangible assets and long-lived assets. We base our estimates on historical experience, where applicable and other assumptions that we believe are reasonable under the circumstances. Actual results may differ from our estimates under different assumptions or conditions. We believe that the following critical accounting policies affect our more significant judgments and estimates used in preparation of our consolidated financial statements.

We maintain allowances for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. We base our estimates on the aging of our accounts receivable balances and our historical write-off experience, net of recoveries.

We value our inventories at the lower of cost or market. We write down inventory balances for estimated obsolescence or unmarketable inventory equal to the difference between the cost of the inventory and the estimated market value based upon assumptions about future demand and market conditions.

Goodwill is reviewed for possible impairment at least annually or more frequently upon the occurrence of an event or when circumstances indicate that the Company's carrying amount is greater than the fair value. In accordance with SFAS 142, the Company examined goodwill for impairment and determined that the Company's carrying amount did not exceed the fair value, thus, there was no impairment.

Generally, sales are recognized when shipments are made to customers. Rebates, allowances for damaged goods and other advertising and marketing program rebates are accrued pursuant to contractual provisions and included in accrued expenses. Certain amount of our revenues fall under the percentage-of-completion method of accounting used for long-term contracts. Under this method, sales and gross profit are recognized as work is performed based on the relationship between actual costs incurred and total estimated costs at completion. Sales and gross profit are adjusted prospectively for revisions in estimated total contract costs and contract values. Estimated losses are recorded when identified.

RESULTS OF OPERATIONS

Net Sales: Net sales for 2011 increased by \$10,428,098 or 75.93%, to \$13,732,153., from \$3,304,055 in 2010. Sales increased during the year of 2011 primarily due to a large project executed by Griffin Filters during the year.

Gross Profit: Gross profits for 2011 increased \$739,628 or 34.70% to \$2,131,412, which was 15.52% of net sales, from \$1,391,784 in 2010, which was 42.12% of net sales. The increase in gross margin in 2011 was a direct results of the large contract executed by Griffin Filters. In 2011, the lower gross margin was a result of the low gross margin of the large project executed during the year.

Operating Expenses: Operating expenses for 2011 decreased \$1,366,089 or 132.96%, to \$1,027,407 from \$2,393,496 in 2010. Operating expenses as percentage of sales decreased in 2011 to 7.48% from 72.44% in 2010. The percentage decrease in operating expenses percentage was primarily due to higher sales in 2011 as compared to 2010. The 132.96% decrease in operating expenses in 2011 was due to lower selling and general expenses as a result of reduced activity in Green DCV and carbon credits business as result of poor market conditions.

Net Income/Loss: The Company had a net income of \$1,010,882 as compared to net loss of \$1,028,682 in 2010 after provision of income tax of \$ 3,445. The net income in 2011 was a direct result of higher sales due to execution of large contract by Griffin Filters.

Provision for Income Taxes: No income tax provision for this year due to Net operating loss carry forward in 2011.

EFFECTS OF INFLATION

The Company's business and operations have not been materially affected by inflation during the periods for which financial information is presented.

LIQUIDITY AND CAPITAL RESOURCES

Working capital was \$443,533 at September 30, 2011, compared to (\$188,465) at September 30, 2010. This included cash and cash equivalents of \$415,369 and \$41,139 at September 30, 2011 and 2010, respectively.

Trade receivables decreased by \$470,419 or 179.85% at September 30, 2011 to \$261,549 from \$731,968 as at September 30, 2010. The decrease in accounts receivable is attributable to change of terms of contract and shipments date. .

Inventories decreased \$69,732 or 21.94% to \$317,896 at September 30, 2011 from \$ 387,628 as at September 30, 2010. The decrease in inventory was due to relatively less purchase of inventory and more shipments of ongoing jobs and contracts.

Continuing operations used (\$101,519) of cash for the fiscal year ended September 30,2011, compared to using (\$968,932) of cash for the fiscal year ended September 30,2010. The decrease in cash flows was primarily related to the increase in inventory combined with increase in accounts payable. Investing activities for continuing operations used \$0 of cash during 2011, compared to providing \$390 during 2010. The Financing activities in 2011 generated \$ 475,749. We believe that our cash on hand, cash generated by operations, may be sufficient to meet the capital demands of our current operations during 2012 fiscal year. Any major increases in sales, big contract with high margin especially in new products, may require substantial capital investment. Failure to obtain sufficient capital could materially impact of growth potential.

Outlook

We anticipate that the outlook for our products and services remains fairly strong and we are positioned well to take advantage of it.

We believe there is currently a gradually increasing public awareness of the issues surrounding air quality and that this trend will continue for the next several years. We also believe there is an increase in public concern regarding the effects of air quality on society and future generations, as well as an increase in interest by standards-making bodies in creating specifications and techniques for detecting, defining and solving air quality problems. As a result, we believe there will be an increase in interest in our emission monitors, and environmental control products of subsidiary Griffin Filters.

This Outlook section, and other portions of this document, include certain “forward-looking statements” within the meaning of that term in Section 27A of the Securities Act of 1933, and Section 21E of the Securities Exchange Act of 1934, including, among others, those statements preceded by, following or including the words “believe,” “expect,” “intend,” “anticipate” or similar expressions. These forward-looking statements are based largely on the current expectations of management and are subject to a number of assumptions, risks and uncertainties. Our actual results could differ materially from these forward-looking statements. Important factors to consider in evaluating such forward-looking statements include those discussed in Item 1A. Risk Factors as well as:

- the shortage of reliable market data regarding the emission monitoring & air filtration market,
- changes in external competitive market factors or in our internal budgeting process which might impact trends in our results of operations,
- anticipated working capital or other cash requirements,
- changes in our business strategy or an inability to execute our strategy due to unanticipated changes in the market,
- product obsolescence due to the development of new technologies, and
- Various competitive factors that may prevent us from competing successfully in the marketplace.

In light of these risks and uncertainties, there can be no assurance that the events contemplated by the forward-looking statements contained in this Form 10-K will in fact occur.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The response to this item is included in “Item 1A Risk Factors” .

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The financial statements required to be included in this report appear as indexed in the appendix to this report beginning on page F-1.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

There have been no changes in and/or disagreements with Gruber & Company, LLC, our independent registered public accountants, on accounting and financial disclosure matters.

ITEM 9A. CONTROLS AND PROCEDURES

Our Chief Executive Officer and Chief Financial Officer (the “Certifying Officers”) are responsible for establishing and maintaining disclosure controls and procedures for the Company. The Certifying Officers have designed such disclosure controls and procedures to ensure that material information is made known to them, particularly during the period in which this Report was prepared.

Evaluation of Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Securities Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms, and that such information is accumulated and communicated to our management, including our chief executive and financial officer, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, as ours are designed to do, and management necessarily was required to apply its judgment in evaluating the cost- benefit relationship of possible controls and procedures.

As of September 30, 2011, an evaluation was performed under the supervision and with the participation of our management, including our Chief Executive Officer and Principal Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based upon that evaluation, our Chief Executive Officer and Principal Financial Officer concluded that our disclosure controls and procedures were effective.

Changes in Internal Controls

There have been no changes in the Company’s internal controls over financial reporting that occurred during the Company’s last fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company’s internal control over financial reporting, except that the Company increased its internal controls around the issuance and recording of common stock sales.

Limitations on the Effectiveness of Controls

A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected. The Company’s disclosure controls and procedures are designed to provide reasonable assurance of achieving its objectives. The Company’s chief executive officer and principal financial officer concluded that the Company’s disclosure controls and procedures are effective at that reasonable assurance level.

ITEM 9B. OTHER INFORMATION

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The following persons are our executive officers and directors. Directors are elected to hold offices until the next annual meeting of Shareholders and until their successors are elected or appointed and qualified. Officers are appointed by the board of directors until a successor is elected and qualified or until resignation, removal or death.

<u>Name and Address</u>	<u>Age</u>	<u>Positions and Offices</u>
Arun Govil 19 Engineers Lane Farmingdale, New York 11735	56	Chairman of the Board of Directors
Saagar Govil 19 Engineers Lane Farmingdale, New York 11735	25	President, Chief Executive Officer, Secretary & Director
Renato Dela Rama 19 Engineers Lane Farmingdale, New York 11735	63	Chief Financial Officer and Director
Ravi Narayan 19 Engineers Lane Farmingdale, New York 11735	52	Vice President and Director

Arun Govil, is the Chairman and has been with the Company since December 2004. Mr. Govil is also President (and owner) of Ducon Technologies Inc., a privately held company engaged in air pollution control systems business since 1996. Prior to 1996 Mr. Govil, Mr. Govil worked at various management and technical positions in the environmental industry. Mr. Govil holds a B.E. degree in Chemical Engineering and a M.B.A. in Finance. He is also a licensed Professional Engineer in New York State and New Jersey.

Saagar Govil has been with the Company since July 2008 and is Company's Chief Executive Officer and President since Dec. 2011. Earlier he was Vice President of operations. Saagar Govil has a B.S. in Materials Engineering from Stony Brooke University, N.Y. Saagar Govil is the son of Arun Govil.

Renato Dela Rama has been our Chief Financial Officer since December 2004. Mr. Dela Rama also works as an accountant for Ducon Technologies Inc. since 2004. Prior to that, he worked in various accounting and financial management positions. Mr. Dela Rama holds a B.S. degree in accounting.

Ravi Narayan has been with the Company since 2002 as general manager. In 2009 he became Vice president of the Company and a Director. From 1993 to 2001 Mr. Narayan worked as a Technical manager at Procal UK Ltd. Mr. Narayan has a BE in Electronic and Instrument Engineering and an MBA in Business administration.

None of our directors or officers is a director in any other reporting companies. None of our directors or officers has been affiliated with any company that has filed for bankruptcy within the last five years. The Company is not aware of any proceedings to which any of the Company's officers or directors, or any associate of any such officer or director, is a party adverse to the Company or any of the Company's subsidiaries or has a material interest adverse to it or any of its subsidiaries.

Each director of the Company serves for a term of one year or until the successor is elected at the Company's annual shareholders' meeting and is qualified, subject to removal by the Company's shareholders. Each officer serves, at the pleasure of the board of directors, for a term of one year and until the successor is elected at the annual meeting of the board of directors and is qualified.

Audit Committee Financial Expert

The Securities and Exchange Commission has adopted rules implementing Section 407 of the Sarbanes-Oxley Act of 2002 requiring public companies to disclose information about "audit committee financial experts." As of the date of this Annual report, we do not have a standing Audit Committee. The functions of the Audit Committee are currently assumed by our full Board of Directors. Additionally, we do not have a member of our Board of Directors that qualifies as an "audit committee financial expert." For that reason, we do not have an audit committee financial expert.

SECTION 16(A) BENEFICIAL OWNERSHIP REPORTING COMPLIANCE

To the best of our knowledge, based solely on a review of the copies of such reports furnished to us and written representation that no other reports are required, Section 16(a) filing requirements applicable to our officers, directors, and greater than ten percent beneficial owners were filed timely during the most recent fiscal year. [

The business address for each of our officers and directors is 19 Engineers Lane, Farmingdale, NY 11735.

ITEM 11. EXECUTIVE COMPENSATION

BOARD OF DIRECTORS

All of our directors hold office until the next annual meeting of stockholders and the election and qualification of their successors. Our executive officers are elected annually by the board of directors to hold office until the first meeting of the board following the next annual meeting of stockholders and until their successors are chosen and qualified.

DIRECTORS' COMPENSATION

We reimburse our directors for expenses incurred in connection with attending board meetings but we do not pay our directors fees or other cash compensation for services rendered as a director.

EXECUTIVE COMPENSATION

The compensation discussion addresses all compensation awarded to, earned by, or paid to the Centrex's named executive officers. As of December 26, 2011, two of our executive officers are currently earning compensation. Set forth below is the aggregate compensation for services rendered in all capacities to us during our fiscal years ended September 30, 2009, 2010 and 2011 by our executive officers. Except as indicated below, none of our executive officers were compensated in excess of \$100,000.

NAME AND PRINCIPAL POSITION	YEAR	SUMMARY COMPENSATION TABLE ANNUAL COMPENSATION TABLE			LONG-TERM
		SALARY	BONUS	OTHER	COMPENSATION AWARDS SECURITIES UNDERLYING OPTIONS/SARS

OPTIONS/SAR GRANTS IN THE LAST FISCAL YEAR

On April 30, 2007, the Company issued a \$1,300,000 Convertible Debenture to Arun Govil the Company's Chairman, CEO, President and Treasurer in conjunction with the purchase of Griffin Filters, Inc. pursuant to the Agreement and Assignment of Membership Interests between Arun Govil and Centrex, Inc. The debenture carried an 8% annual interest rate with interest payable semiannually in arrears on the first business day of January and July each year. The debenture principle was due and payable on April 30, 2011.

The debenture had the right of conversion into 30,000,000 non-assessable shares of common stock of the Company at \$0.001 (par value) per share. Conversion is not exercisable prior to December 31, 2007. Commencing December 31, 2007 and continuing to April 30, 2011, the Debenture Holder had the right of conversion subject to the terms and conditions of the debenture. In the event the face amount of the debenture was not fully converted on or before April 30, 2011, the conversion rights will lapse.

On September 8, 2009, the Company entered into a letter agreement with Arun Govil, the Chairman, Chief Executive Officer, Treasurer and President of the Company. Pursuant to the letter agreement Arun Govil agreed to cancel the convertible promissory note, held by him, dated April 30, 2007 (the " Note "). The principal balance of the Note was \$1,300,000. Pursuant to the terms of the Note, the outstanding amount was convertible into 30,000,000 shares of our common stock. Pursuant to the letter agreement, in return for cancelling the Note, the Company issued Arun Govil 2,500,000 shares of our common stock and 1,000,000 shares of our Series A Preferred Stock. Pursuant to the Certificate of Designation of the Preferred Stock, each issued and outstanding Preferred Stock shall be entitled to the number of votes equal to the result of: (i) the number of shares of Common Stock issued and outstanding at the time of such vote multiplied by 1.01; divided by (ii) the total number of Preferred Stock issued and outstanding at the time of such vote, at each meeting of shareholders of the Company with respect to any and all matters presented to the shareholders of the Company for their action or consideration, including the election of directors. In consideration of the issuance of the Common Stock and Preferred Stock described above, Mr. Govil agreed to forfeit 27,500,000 shares of our common stock issuable as per the original terms of the Note.

AGGREGATED OPTION/SAR EXERCISES IN LAST FISCAL YEAR AND FISCAL YEAR END OPTION/SAR VALUES

None.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The following table sets forth certain information known to us with respect to the beneficial ownership of our common stock as of December 26, 2011 by:

o all persons who are beneficial owners of five percent (5%) or more of our common stock;

o each of our directors;

o each of our executive officers; and

o all current directors and executive officers as a group.

Except as otherwise indicated, and subject to applicable community property laws, the persons named in the table below have sole voting and investment power with respect to all shares of common stock held by them.

As of December 26, 2011, 40,599,129 shares of common stock are issued and outstanding. Applicable percentage ownership in the following table is based on 40,599,129 shares of common stock outstanding as of December 26, 2011.(1)

Beneficial ownership is determined in accordance with the rules of the SEC. In computing the number of shares beneficially owned by a person and the percentage ownership of that person, shares of common stock subject to options held by that person that are currently exercisable or exercisable within 60 days of December 26, 2011 are deemed outstanding. Such shares, however, are not deemed outstanding for the purpose of computing the percentage ownership of any other person.

<u>Title of Class</u>	<u>Name and Address of Owner</u>	<u>Title</u>	<u>Amount Owned</u>	<u>Percentage of Issued Common Stock (1)</u>
Common Stock	Arun Govil 19 Engineers Lane Farmingdale, New York 11735	Chairman of the Board	25,430,000 (2)(3)	64.0
Preferred Stock	Arun Govil 19 Engineers Lane Farmingdale, New York 11735	Chairman of the Board	1,000,000(2)	+
Common Stock	Saagar Govil 19 Engineers Lane Farmingdale, New York 11735	Chief Executive Officer & President & Director	3,000,000	7.6
Common Stock	Ravi Narayan 19 Engineers Lane Farmingdale, New York 11735	Vice President and Director	800,000	0
Common Stock	Renato Dela Rama 19 Engineers Lane Farmingdale, New York 11735	Chief Financial Officer and Director	400,000	1.0
Common Stock	All directors and executive officers as a group (4 persons)		29,630,000	74.6

- (1) Except as otherwise noted herein, the percentage is determined on the basis of 40,599,129 shares of our common stock outstanding plus securities deemed outstanding pursuant to Rule 13d-3 promulgated under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Under Rule 13d-3, a person is deemed to be a beneficial owner of any security owned by certain family members and any security of which that person has the right to acquire beneficial ownership within 60 days, including, without limitation, shares of our common stock subject to currently exercisable options.
- (2) The Series A Preferred Stock issued by the Company to Arun Govil the Company's Chairman and former CEO, President and Treasurer in conjunction with the settlement of the debenture issued as consideration for the purchase of Griffin Filters, Inc. Pursuant to the Certificate of Designation of the Preferred Stock, each issued and outstanding Preferred Stock shall be entitled to the number of votes equal to the result of: (i) the number of shares of Common Stock issued and outstanding at the time of such vote multiplied by 1.01; divided by (ii) the total number of Preferred Stock issued and outstanding at the time of such vote, at each meeting of shareholders of the Company with respect to any and all matters presented to the shareholders of the Company for their action or consideration, including the election of directors. The shares of Series A Preferred Stock represent 100% of the total Series A Preferred Stock issued and outstanding.
- (3) Includes the shares owned by Ducon Technologies Inc. is owned by Arun Govil the Chairman and former Chief Executive Officer, Treasurer and President of the Company.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

On September 8, 2009, the Company entered into a letter agreement with Arun Govil, the Chairman and former Chief Executive Officer, Treasurer and President of the Company. Pursuant to the letter agreement Arun Govil agreed to cancel the convertible promissory note, held by him, dated April 30, 2007 (the "Note") in connection with the purchase of Griffin Filters LLC ("Griffin"). The principal balance of the Note was \$1,300,000. Pursuant to the terms of the Note, the outstanding amount was convertible into 30,000,000 shares of our common stock. Pursuant to the letter agreement, in return for cancelling the Note, the Company issued Arun Govil 2,500,000 shares of our common stock and 1,000,000 shares of our Series A Preferred Stock. Pursuant to the Certificate of Designation of the Preferred Stock, each issued and outstanding Preferred Stock shall be entitled to the number of votes equal to the result of: (i) the number of shares of Common Stock issued and outstanding at the time of such vote multiplied by 1.01; divided by (ii) the total number of Preferred Stock issued and outstanding at the time of such vote, at each meeting of shareholders of the Company with respect to any and all matters presented to the shareholders of the Company for their action or consideration, including the election of directors. In consideration of the issuance of the Common Stock and Preferred Stock described above, Mr. Govil agreed to forfeit 27,500,000 shares of our common stock issuable as per the original terms of the Note.

Ducon Technologies, Inc. is owned by Arun Govil, the Chairman of the Company.

Renato Dela Rama the Chief Financial Officer of the Company is also an accountant with Ducon Technologies Inc.

Saagar Govil, Chief Executive Officer & President, is the son of Arun Govil the Chairman of the Company.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The Company's Board of Directors does not have an Audit Committee.

The following table sets forth the aggregate fees billed to us for the years ended September 30, 2011 and September 30, 2010 by Gruber & Company, LLP, our independent auditors for the fiscal years ended September 30, 2011 and 2010:

	2010	2011
Audit Fees	33,000	\$ 30,000
Audit-Related Fees	1,546	\$ 1,500
Tax Fees		\$
Other Fees		\$
Totals	34,546	\$ 31,500

Audit fees represent amounts billed for professional services rendered for the audit of our annual financial statements. Audit-Related Fees include amounts billed for professional services rendered in connection with our SEC filings and discussions with the SEC that occurred during fiscal 2011 for us to become a fully reporting public company. Our Board of Directors is of the opinion that the Audit-Related Fees charged by Gruber & Company, LLC, LLP were consistent with Gruber & Company, LLC maintaining its independence from us.

The Board of Directors has considered whether provision of the non-audit services described above is compatible with maintaining the independent accountant's independence and has determined that such services did not adversely affect Gruber & Company, LLC independence.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

THE BOARD OF CEMTREX, INC.

We have audited the accompanying consolidated balance sheet of Cemtrex, Inc. and Subsidiary as of September 30, 2011 and 2010, and the related consolidated statements of operations, stockholders equity and cash flows for the periods then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform our audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Cemtrex, Inc. and Subsidiary at September 30, 2011 and 2010, and the results of its' consolidated operations and its' consolidated stockholders equity and consolidated cash flows for the periods then ended in conformity with accounting principles generally accepted in the United States of America.

Cemtrex Inc. and Subsidiaries

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 – Organization, Business & Operations

Cemtrex, Inc. and its wholly-owned subsidiary Griffin Filters, LLC (collectively the “Company”), is engaged in manufacturing and selling advanced instruments for emission monitoring of particulate, opacity, mercury, sulfur dioxide, nitrogen oxides, etc. Cemtrex also provides turnkey services for carbon creation projects from abatement of greenhouse gases pursuant to Kyoto protocol and assists project owners in selling of carbon credits globally. Company's products are sold to power plants, refineries, chemical plants, cement plants and other industries including federal and state governmental agencies. Through its wholly-owned subsidiary, Griffin Filters, the Company designs, manufactures and sells air filtration equipment and systems to control particulate emissions in a variety of industries. The Company has also set up a subsidiary Cemtrex India Pvt. Ltd., located in Mumbai, India to sell emission monitors and related industrial equipment.

Cemtrex, Inc. was incorporated as Diversified American Holding, Inc. on April 27, 1998. On December 16, 2004, the Company changed its name to Cemtrex, Inc. On April 30, 2007, Cemtrex, Inc. acquired Griffin Filters, LLC (see Note 5 – Business Combination and Related Party Transactions).

Note 2 - Summary of Significant Accounting Policies

This summary of significant accounting policies of Cemtrex Inc. (the Company) is presented to assist in understanding the Company’s financial statements. The financial statements and notes are representations of the Company’s management, who is responsible for their integrity and objectivity. These accounting policies conform to generally accepted accounting principles and have been consistently applied in the preparation of the financial statements.

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of Cemtrex, Inc. and its wholly subsidiaries Griffin Filters, LLC and Cemtrex India (collectively the “Company”). All significant inter-company accounts and transactions have been eliminated in consolidation.

The acquisition of Griffin Filters, LLC by Cemtrex, Inc. was treated as a business combination due to the fact that the acquired entity and purchased entity were owned by the same individual. Therefore, these consolidated financial statements have been retrospectively adjusted for all periods presented.

Accounting Method

The Company’s financial statements are prepared using the accrual method of accounting. The Company has elected a September 30 year-end.

Foreign Operations

Operations outside the United States include a subsidiary in India. Foreign operations are subject to risks inherent in operating under different legal systems and various political and economic environments. Among the risks are changes in existing tax laws, possible limitations on foreign investment and income repatriation, government price or foreign exchange controls, and restrictions on currency exchange. Net assets of foreign operations are less than 10% of the Company’s total net assets.

The financial statements of the Company's India subsidiary are prepared using the U.S. dollar as the functional currency. As a result, the transactions of those operations that are denominated in foreign currencies are remeasured into U.S. dollars, and any resulting gains or losses are included in earnings.

Cash and cash equivalents

The Company considers all liquid investments with a maturity of three months or less from the date of purchase that are readily convertible into cash to be cash equivalents.

Concentration of Credit Risk

Financial instruments, which potentially subject the Company to concentrations of credit risk, consist of cash and accounts receivable. The Company places its cash with high quality financial institutions and at times may exceed the FDIC \$250,000 insurance limit. The Company extends credit based on an evaluation of the customer's financial condition, generally without collateral. Exposure to losses on receivables is principally dependent on each customer's financial condition. The Company monitors its exposure for credit losses and maintains allowance for anticipated losses as required.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Estimates also affect that reported amounts of revenues and expenses during the reporting period. Actual events and results could differ from those assumptions and estimates.

Inventories

Inventories are comprised of replacement parts, system components and finished systems, which are stated at lower of cost or market. Cost is determined on a first-in, first-out (FIFO) basis. A valuation allowance is provided for obsolete and slow-moving inventory to write cost down to market if necessary. As of September 30, 2011 and 2010 the Company determined that no valuation allowance was required.

Property and Equipment

Property and equipment are stated at cost and are depreciated using the straight-line method over their estimated useful lives, generally five to seven years. Leasehold improvements are amortized over the shorter of the useful life or the remaining lease term. Upon retirement or other disposition of these assets, the cost and related accumulated depreciation are removed from the accounts and the resulting gains or losses are reflected in operations. Expenditures for maintenance and repairs are charged to operations as incurred. Renewals and betterments are capitalized.

Impairment of long-lived asset

The Company reviews its long-lived assets and identifiable intangibles for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. When such factors and circumstances exist, management compares the projected undiscounted future cash flows associated with the future use and disposal of the related asset or group of assets to their respective carrying values. Impairment, if any, is measured as the excess of the carrying value over the fair value, based on market value when available, or discounted expected cash flows, of those assets and is recorded in the period in which the determination is made. During fiscal years ended September 30, 2011 and 2010, the Company recorded \$0 impairment loss on long-lived assets.

Basic and Diluted Net Income per Share

Basic earnings per share is calculated using the weighted-average number of common shares outstanding during the period without consideration of the dilutive effect of stock warrants and convertible notes. Diluted earnings per share is calculated using the weighted-average number of common shares outstanding during the period after consideration of the dilutive effect of stock warrants and convertible notes.

Revenue recognition

The Company's revenues are generated principally from the sale of its products. Revenue from the sale of products is recognized at the time title, risks and rewards of ownership pass. This is generally when the products reach the free-on-board shipping point, the sales price is fixed and determinable and collection is reasonably assured.

When a sales contract qualifies for percentage of completion accounting, the revenue is recognized using the percentage-of-completion method, measured by the percentage of costs incurred to date compared to estimated total costs for each contract. Provisions for estimated losses on contracts in progress are made in the period in which such losses are determined.

Cost of sales

The Company includes all costs directly related to the production of goods for sale in cost of goods sold. The Company classifies direct material, direct labor, production related overheads, freight and distribution costs, and the depreciation and amortization of assets directly used in the production of goods for sale as cost of sales in the statement of operations.

Selling, general and administrative expenses

The Company includes all costs not directly related to the production of goods for sale in selling, general and administrative expenses. These costs include mainly administrative and selling labor, related support materials and the depreciation and amortization of assets used in the administrative and selling functions.

Shipping and Handling Costs

Freight billed to customers is considered sales revenue and the related freight cost as a cost of sales.

Allowance for Doubtful Accounts

We provide an allowance for estimated uncollectible accounts receivable balances based on historical experience and the aging of the related accounts receivable. As of September 30, 2011 and 2010, the Company has reserved \$100,000 and \$100,000 respectively for doubtful accounts.

Advertising

The Company expenses advertising costs as incurred. The Company incurred \$3,753 and \$25,450 in advertising costs for the years ended September 30, 2011 and 2010, respectively.

Income Taxes

The Company accounts for income taxes under the provisions of FASB ASC 740, "Income Taxes", formerly referenced as SFAS No. 109, "Accounting for Income Taxes". Under the provisions of FASB ASC 740, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between their financial statement carrying values and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Significant judgment is required in determining any valuation allowance recorded against deferred tax assets. In assessing the need for a valuation allowance, the Company considers all available evidence including past operating results, estimates of future taxable income, and the feasibility of tax planning strategies. In the event that the Company changes its determination as to the amount of deferred tax assets that can be realized, the Company will adjust its valuation allowance with a corresponding impact to the provision for income taxes in the period in which such determination is made.

The provision for income taxes is as follows:

	2011	2010
Current taxes payable:		
Federal	\$ —	\$ —
State	—	—
Foreign	—	—
	<u>—</u>	<u>—</u>
Deferred tax asset:	(49,989)	(421,760)
Deferred tax valuation allowance	49,989	421,760
	<u>—</u>	<u>—</u>
Total	<u>\$ —</u>	<u>\$ —</u>

Reconciliation of the federal statutory income tax rate to the effective income tax rate is as follows:

	2011	2010
U.S. statutory rate	34.0%	34.0%
State income taxes (net of federal benefit)	7.0	7.0
Taxes on foreign income in excess of U.S. tax	—	—
Benefit of net operating loss carryforward	(41.0)	(41.0)
Effective rate	<u>—%</u>	<u>—%</u>

Fair Value of Financial Instruments

ASC Topic 820, "Fair Value Measurements and Disclosures," requires disclosure of the fair value of financial instruments held by the Company. ASC Topic 825, "Financial Instruments," defines fair value, and establishes a three-level valuation hierarchy for disclosures of fair value measurement that enhances disclosure requirements for fair value measures. The carrying amounts reported in the consolidated balance sheets for receivables and current liabilities each qualify as financial instruments and are a reasonable estimate of their fair values because of the short period of time between the origination of such instruments and their expected realization and their current market rate of interest.

The three levels of valuation hierarchy are defined as follows:

- Level 1 inputs to the valuation methodology are quoted prices for identical assets or liabilities in active markets.

- Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

- Level 3 inputs to the valuation methodology are unobservable and significant to the fair value measurement.

Stock-based compensation

The Company records compensation expense associated with stock options and other forms of employee and non-employee equity compensation in accordance with FASB ASC 718, "Compensation – Stock Compensation", formerly referenced as SFAS 123R, "Share-Based Payment". The Company estimates the fair value of stock options granted using the Black-Scholes-Merton option-pricing formula and a single option approach. This fair value is then amortized on a straight-line basis over the requisite service periods of the awards, which is generally the vesting period.

During fiscal years ended September 30, 2011 and 2010, the Company incurred \$-0- and \$-0- in stock-based compensation expense.

Reclassifications

Certain items in the prior year financial statements have been reclassified for comparative purposes to conform to the presentation in the current period's presentation. These reclassifications have no effect on the previously reported income (loss).

Recently Issued Accounting Pronouncements

In September 2011 the Accounting Standards Update No. 2011-08, Intangibles - Goodwill and Other (Topic 350): Testing Goodwill for impairment. This ASU's objective is to simplify the process of performing impairment testing for Goodwill. With this update a company is allowed to assess qualitative factors, first, to determine if it is more likely than not (greater than 50%) that the FV is less than the carrying amount. This would be done, prior to performing the two-step goodwill impairment testing, as prescribed by Topic 350. Prior to this ASU, all entities were required to test, annually, their good will for impairment by Step 1 - comparing the FV to the carrying amount, and if impaired, then step 2 - calculate and recognize the impairment. Therefore, the fair value measurement is not required, until the "more likely than not" reasonableness test is concluded. Effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011.

In May 2011, FASB issued Accounting Standards Update No. 2011-04, Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. This ASU clarifies the board's intent of current guidance, modifies and changes certain guidance and principles, and adds additional disclosure requirements concerning the 3 levels of fair value measurements. Specific amendments are applied to FASB ASC 820-10-35, Subsequent Measurement and FASB ASC 820-10-50, Disclosures. This ASU is effective for interim and annual periods beginning after December 15, 2011.

In June 2011, FASB issued Accounting Standards Update No. 2011-05, Comprehensive Income (Topic 220): Presentation of Comprehensive Income. - ASU 2011-05. Current US GAAP allows companies to present the components of comprehensive income as a part of the statement of changes in stockholders' equity. This ASU eliminates that option. In this Update, an entity has the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. This ASU is effective interim and annual periods beginning after December 15, 2011. This ASU should be applied retrospectively. There are no specific transition disclosures.

The Company has implemented all new accounting pronouncements that are in effect. These pronouncements did not have any material impact on the consolidated financial statements unless otherwise disclosed, and the Company does not believe that there are any other new accounting pronouncements that have been issued that might have a material impact on its financial position or results of operations.

Note 3 - Property and Equipment

At September 30, 2011 and September 30, 2010, property and equipment are comprised of the following:

	September 30,	
	<u>2011</u>	<u>2010</u>
Furniture and Office Equipment	\$ 83,687	\$ 83,687
Computer Software	4,631	4,631
Machinery and Equipment	78,392	78,392
Less: Accumulated Depreciation	(127,379)	(104,437)
Net Property and Equipment	<u>\$ 39,331</u>	<u>\$ 62,273</u>

Depreciation for the twelve months ended September 30, 2011 and 2010 was \$22,942 and \$23,255, respectively.

Note 4 – Prepaid Expenses and Other Current Assets

At September 30, 2011 and September 30, 2010, prepaid expenses and other current assets are comprised of the following:

	September 30,	
	<u>2011</u>	<u>2010</u>
Deposits on inventory	<u>\$ 263,174</u>	<u>\$ 4,022</u>

Note 5 – Note Payable - Officer

Notes Payable to Arun Govil, the Company's Chairman, Chief Executive Officer, Treasurer and President total \$1,520,178 and accrues interest at 5% per annum. The note payable is unsecured and has no due date.

Note 6 – Convertible Debenture

On September 8th, 2009, Cemtrex, Inc. entered into a letter agreement with Arun Govil, the Chairman, Chief Executive Officer, Treasurer and President of the Company. Pursuant to the letter agreement Arun Govil agreed to cancel the convertible promissory note, held by him, dated April 30, 2007. The principal balance of the Note was \$1,300,000. Pursuant to the terms of the Note, the Outstanding Amount was convertible into 30,000,000 shares of the Company's common stock. Pursuant to the letter agreement, in return for cancelling the Note, the Company issued Arun Govil 2,500,000 shares of common stock of the Company, par value \$0.001 and 1,000,000 shares of Series A Preferred Stock of the Company, par value \$0.001 per share. Mr. Govil agreed to forfeit 27,500,000 shares of common stock issuable as per the original terms of the Note.

Note 7 – Bank Line of Credit

On Feb 1, 2010, Cemtrex entered into a \$250,000 Commercial line of Credit with JP Morgan Chase Bank. The note carries a variable interest rate at 3.75% over the LIBOR rate, with an interest rate of 4.00625% at September 30, 2010. Accrued interest and fees are payable monthly, with the entire principle balance due at maturity on February 1, 2011. At September 30, 2011 the balance due on the line of credit was \$-0-.

Note 8 – Convertible Note, net of Discount and Derivative Liability

On Feb 12, 2010, Cemtrex issued a \$50,000 convertible debenture to an unrelated third party, Asher Enterprises Inc., that bears interest at 8% per year and matures on December 12, 2010 at which time it is convertible into Cemtrex common shares at a conversion price equaling 65% of the average trading price during the past ten days from the maturity date. The Company repaid the note during the first quarter ended December 31, 2010.

Per EITF 00-19, paragraph 4, this convertible note does not meet the definition of a “conventional convertible debt instrument” since the debt is not convertible into a fixed number of shares. The debt can be converted into common stock at a conversion price that is a percentage of the market price; therefore, the number of shares that could be required to be delivered upon “net-share settlement” is essentially indeterminate. Therefore, the convertible debenture is considered “non-conventional,” which means that the conversion feature must be bifurcated from the debt and shown as a separate derivative liability. The Company recognized a derivative liability of \$32,655 on February 12, 2010, with an offset to debt discount in the same amount.

Note 9 – Stockholders’ Equity**Series A Preferred Stock**

The Company is authorized to issue 10,000,000 shares of Series A Preferred Stock, \$0.001 par value. As of September 30, 2011 and September 30, 2010, there were 1,000,000 shares issued and outstanding, respectively.

Each issued and outstanding Series A Preferred Share shall be entitled to the number of votes equal to the result of: (i) the number of shares of common stock of the Company issued and outstanding at the time of such vote multiplied by 1.01; divided by (ii) the total number of Series A Preferred Shares issued and outstanding at the time of such vote, at each meeting of shareholders of the Company with respect to any and all matters presented to the shareholders of the Company for their action or consideration, including the election of directors. Holders of Series A Preferred Shares shall vote together with the holders of Common Shares as a single class.

On September 8th, 2009, the Company issued 1,000,000 Series A Preferred Shares to Arun Govil, the Chairman, Chief Executive Officer, Treasurer and President of the Company, in conjunction with the conversion of a convertible note (see Note 7).

Common Stock

The Company is authorized to issue 60,000,000 shares of common stock, \$0.001 par value. As of September 30, 2011 and 2010, there were 39,822,862 and 39,822,862 shares issued and outstanding, respectively.

On September 8th, 2009, the Company issued 2,500,000 common shares to Arun Govil, the Chairman, Chief Executive Officer, Treasurer and President of the Company, in conjunction with the conversion of a convertible note (see Note 7). In addition, the Company issued 2,895,000 common shares for cash totaling \$8,525.

During March, 2010 the Company issued 100,000 common shares for services totaling \$24,000.

Note 10 – Commitments & Contingencies

Lease Obligations

The Company leases its principal office at Farmingdale, New York, 4000 square feet of office and warehouse/shop space in a single story commercial structure on a month to month lease from Ducon Technologies Inc., at a monthly rental of \$2,157.

The Company's subsidiary Griffin Filters LLC leases approx. 10,000 sq. ft. of office and warehouse space in Liverpool, New York from a third party in a five year lease at a monthly rent of \$4,225 expiring on March 31, 2012. Effective May 1, 2010, with the same lease contract but less area of footage, the new monthly rent is now \$2,850.00.

Legal Proceedings

The Company is not currently involved in any lawsuits or litigation.

A Demand for Arbitration was filed on December 19, 2009 by Sindicatum Carbon Technology Limited, a U.K. company before the JAMS arbitration and mediation society in New York City. In the JAMS claim, SCT alleged breaches of contract by the Company. The Company filed counter claims against SCT for breaches of contract. A parallel action was filed by SCT before the Court of Arbitration and Mediation in the Chamber of Commerce and Industry of Geneva (the "Geneva Claim"). In early December, 2010, SCT and the Company agreed to settle all matters in dispute between them without the payment of money or other consideration by either side. The JAMS Claim and the Geneva Claim were each discontinued, with prejudice. As of September 30, 2010 the Company charged off as a bad debt the balance of \$488,237 which was recorded as due from SCT relating to this contract.

Note 11– Concentrations and Related Party Transactions

The Company has operations in the United States and India. Sales in the United States totaled \$2,781,143 and \$3,304,055 for the years ended September 30, 2011 and 2010. Sales in India totaled \$10,951,010 and \$-0- for the years ended September 30, 2011 and 2010.

The Company's net assets in India totaled \$3,877 and \$-0- at September 30, 2011 and 2010.

The Company had sales to Ducon Technologies, Inc., a related party, totaling \$8,920,875 and \$200,000 for the years ended September 30, 2011 and 2010. The accounts receivable from Ducon Technologies, Inc. totaled \$1,127,575 and \$200,000 at September 30, 2011 and 2010.

The Company has prepaid Ducon Technologies, Inc. a related party in the amount of \$263,174 for supplies at September 30, 2011.

CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002, I, Saagar Govil, certify that:

1. I have reviewed this report on Form 10-K of Cemtrex, Inc., for the fiscal year ended September 30, 2011;
 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonable likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls over financial reporting.
-
